Office Action Summary

Art Unit: 1102

This application contains claims directed to the following patentably distinct species of the claimed invention:

- ✓ 1) counter/reference electrode of a material to minimize analyte reaction thereat
- ✓ 2) a poison for a catalyst of the analyte reaction
- ✓ 3) counter/reference electrode at a certain potential
- 4) gaseous or liquid reagent for minimizing the analyte reaction while promoting the complementary reaction at the counter/reference electrode
- ✓ 5) barrier that minimizes access of analyte to counter/reference electrode
- ✓ 6) scavenger material or electrode reacting with analyte before it can reach counter/reference electrode
- ✓ 7) lengthy path between working electrode and counter/reference electrode
- 8) reconvertng analyte product to analyte and reacting it again at the working electrode.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1102

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The examiner can be reached at 703-308-3329. His supervisor Nam Nguyen can be reached at 703-308-3322. Any general inquiry should be directed to the receptionist at 703-308-0661. A fax number for TC 1700 is 703-872-9310.
